

# boxgutters

## DETAIL SHEET 1

### Notes:

1. The girth of the box gutter and its related drain pipes must be adequate to cope with the expected run off of water.
2. The base of all box gutters are to be sloped.
3. Periodic inspection and cleaning of box gutters is essential.
4. It is suggested that the stopends be lower than both the upstand and inner face of the box gutter to prevent flooding of the roof areas in the event of flash floods.
